OceanBase Partners with Navicat for Enhanced Database Management Solutions

"Navicat's integration has significantly boosted user convenience. Navicat offers OceanBase users efficient collaborative database development and data management for a variety of scenarios."

Zhongyan Feng
Architecture Specialist, OceanBase

About OceanBase

OceanBase Database is a distributed relational database developed by Ant Group. It has been supporting the Double 11 Shopping Festival for 11 years and is also the only distributed database in the world that has refreshed both TPC-C and TPC-H records. It has set forth a new standard of city-level disaster recovery solutions with five IDCs across three sites. OceanBase Database supports hybrid transaction/analytical processing (HTAP) with one engine. OceanBase has helped over 1000 customers across industries upgrade their core systems.

Industry:
Software and Services

Product:
Navicat Premium

The Challenge

We consistently aspire for users to utilize the OceanBase database in a simple and efficient way across various environments.

How Did Navicat Help?

Navicat recognized the importance of tailored support for OceanBase users. Through diligent testing and adaptation, Navicat seamlessly integrated with OceanBase, ensuring a harmonious user experience.

Benefits

The collaboration between OceanBase and Navicat simplifies database management. Navicat's user-friendly interface enables efficient navigation and operation of OceanBase, reducing the need for extensive technical knowledge. Users can now manage OceanBase effortlessly, enhancing productivity and efficiency.
